

### Notice of Know-how-Transfer

After 42 years of intense activity **MAZZOLA ENGINEERING's Machinery Division** is halting its operations.

Over 400 machines have been developed, engineered, built and delivered during that time.

However, the fully automatic continuous coil feeder –our main product- has not reached the end of the line yet.

**ARKU Maschinenbau GmbH of Baden-Baden, Germany**, is taking over the full know-how and basic engineering data of our most successful models AN-45 and AN-65 to be further developed, built and marketed throughout the world.

**MAZZOLA ENGINEERING will assist ARKU** during the next five years to guarantee a smooth and flowless transfer of all engineering, dimensional and operational parameters.

We would not miss to thank all our customers for their confidence and consideration toward our company and its products. The past 42 years have been a superb and gratifying adventure.

*Ivo A. Mazzola, CEO*
